

Impact Statement for Parents Association Grant

Earlier this year, Campus Recreation was awarded a grant from the Parents Association to purchase an AED for our new Recreation and Wellness Center on East Campus. The \$1,599 was used to purchase the AED, wall mounted cabinet, and necessary accessories.

The AED pictured below is located on the first floor of the RWC, near the weight training area and golf simulator. The facility has seen over 30,000 student visits since it opened mid-July. Having the AED helps us know that if a cardiac emergency were to occur, we would have the necessary lifesaving equipment readily available.

Thank you to the UNL Parents Association for your generous support!

*Sorry for the odd angle of the picture; there is a wall of windows directly across from the AED that makes a terrible glare if you try to photograph it straight-on.
